11.

DURING OPERATIONS

- (1) When they exist, surface soil from areas to be mined will be stockpiled for later use.
- (2) Overburden waste will be deposited in mined out areas or piled in locations suitable for later regrading.
- (3) Clay will be ripped and stockpiled in designated areas.
- (4) As mined areas become depleted of clay, they will be graded and stabilized by planting specified seed.
- (5) All mining will be done in a safe orderly miner-like manner.

AFTER OPERATIONS

- (1) Areas disturbed and waste piles will be regraded to stable slopes of less than 45° .
- (2) Areas disturbed and waste piles will be planted with a specified seed.
- (3) Surface structures, debris, and scrap will be buried, removed from the site or otherwise permanently disposed of.
- (4) Roads other than main access roads will be ripped, regraded, and planted with a specified seed.
